

Fast Track to the Sea: implementing the last mile rail connections in the port of Civitavecchia

Action n. 2019-IT-TA-0034-M

Intermediate Conference and Design Presentation

6th of May 2022

11.00-13.00

This workshop aims at presenting the main outcomes of the design studies for the new railway connections of the port of Civitavecchia with the Italian TEN-T Network. The studies have been financed under the CEF Connecting Europe Facility Programme and they will be used as a basis for the works that will be carried out by the end of 2023. The realization of the project pipeline will permit to improve the efficiency of the shunting operations inside the port of Civitavecchia, increasing the length of the module, removing the interferences between different transport systems. This will result in a more competitive environment for rail transport services on the TEN-T Network.

Agenda

Moderator

Mr. Francesco Barontini – PTSCLAS spa

Introduction

Mr. Pino Musolino, President Port Authority of Civitavecchia

Mr. Luca Lupi, Project Manager Port Authority of Civitavecchia

Presentation of the results of the design studies and next steps

Mr. Giancarlo Tanzi, TechProject

Mr. Maurizio Marini, Technical Director Port Authority of Civitavecchia

The CEF2 Programme in the European Transport Policies perspective

Mr. Julian Espina, Project Officer CINEA Climate, Infrastructure and Environment Executive Agency

The revision of the Ten-T Networks in the Italian Transport Policies perspective

Ms. Federica Polce, Head of the Ten-T Unit Italian Ministry of Sustainable Infrastructures and Mobility

The opinion of the operators

Mr. Agostino Morlino, Roma Terminal Container

Mr. Pierpaolo Olla, RFI - Development and Marketing Department for the Central-Southern Tyrrhenian railway network
